(54) Title: METHOD OF MAKING KAOLIN CONTAINING SILICONE RUBBER COMPOSITIONS

(57) Abstract: A treated kaolin containing silicone rubber composition consisting essentially of an organopolysiloxane, treated kaolin, a curing agent; and optional additives selected from the group of one or more rheology modifiers, pigments, colouring agents, anti-adhesive agents, plasticizers, adhesion promoters, blowing agents, fire retardants and dessicants which composition is substantially free of reinforcing fillers. These finished kaolin containing silicone rubber compositions are useful in applications such as silicone profile extrusions, wire and cable coatings, glazing, and for construction gaskets.
